

Video Production Rate Card 2022

A **Video Production** usually has its own *unique* requirements requiring a customized quote depending on the equipment, operators and time needed to achieve your goal. Larger projects can often work out differently, depending on crew and kit required. Included here is an example of our prices and packages **meant as a guide of what we can offer.**

A consultation helps us to understand your needs and advise you best.

Camera Operator, Editing Rates

Single camera operator: Services of an experienced camera operator with a professional 4K digital camera, plus basic audio recording and lighting, from these rates we can generate custom quotes for corporate & marketing videos, customer testimonial videos, online promos, TVC's etc.

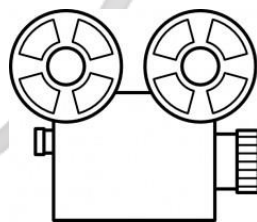

It is very important that we have a full brief of requirements, as we have a variety of cameras and equipment that can be used to suit different production scenarios.

Some examples include VR suitable 360 production with the Ricoh Theta 360, larger scale broadcast production using Sony FX9 , FX6, FX3 cameras and the smaller but awesome, Sony Alpha series.

Yup.

This can all be a little overwhelming so the team here at Saffron Asia Media wish to make things easy for you, so we have assembled some basic packages.

Let us know which package interests you and when you wish to start rolling...

Corporate Video Packages

You already have a script and a concept, event to cover, testimonials etc...

****Please Note****

Our packages are designed to provide BASIC video services. No SFX, no models/actors.
